

HBV Lab Tests

Screening tests for Hepatitis B:

- **HBsAG** - Hepatitis B Surface Antigen with Reflex to Confirmation
- **HBsAb (Anti-HBs)** - Hepatitis B Surface Antibody, Quantitative
- **HBcAb (Anti-HBc)** - Hepatitis B Core Antibody (Total or IgG)

If **HBsAg+**, then order the following lab tests:

- HBV DNA
- HBeAg/anti-HBe
- Anti-HDV
- Order an **HCV antibody (Ab)** with reflex to **HCV RNA Quantitative** and **HCV genotype**
- HIV-1/2 antigen-antibody test
- CBC with platelets
- CMP with hepatic function and eGFR
- PT/INR
- Measure of Fibrosis (FibroSure, FibroAct, etc.) and/or Fibroscan if available
- Abdominal ultrasound

*Resistance-associated substitutions (RAS) - (only needed if the patient was previously treated)

*Serum pregnancy test if needed

*Urine testing for STDs (Gonorrhea & Chlamydia) - Arkansas Dept. of Health screening

*Syphilis – Arkansas Dept. of Health screening

* Only needed if relevant.
